Muhammad Haykal Qadhafi

FRONTEND DEVELOPMENT | WEB APPLICATION DEVELOPMENT

Setiabudi, Jakarta Selatan | 085173260010 | haykalqadhf20@gmail.com

Professional Summary

Fresh Information Technology graduate from Telkom University Jakarta with hands-on experience in application development, UI implementation, and system performance testing through academic projects and technical internships. Experienced in building cross-platform applications using Flutter and Dart, developing modular UI components, and integrating Firebase Authentication and Cloud Firestore for real-time data management. Proficient in JavaScript and familiar with modern web technologies, including Bootstrap, Tailwind CSS, and Next.js, with additional experience in SQL-based data processing and software performance evaluation. Demonstrates strong analytical thinking, problem-solving, and attention to detail in developing functional and user-focused applications.

Work Experience

PT Telekomunikasi Selular (Telkomsel) | Data Analyst **August 2025 – October 2025**

- Processed and categorized 400,000+ B2B invoice records using MySQL and Microsoft Excel, organizing records into three categories: Ready, CA, and CO.
- Performed data cleaning, validation, and invoice data mapping across key identifiers, including corporate_id, mapping_project_id, and MSISDN, to maintain data consistency.
- Investigated invoice data discrepancies and collaborated with the outsourcing administration team to validate records and resolve inconsistencies.

Education

Telkom University, Jakarta **Sep 2022 – Jan 2026**

Bachelor of Information Technology ☑ | GPA: 3.84/4.00 ☑

- Developed a technical foundation in programming, application development, database management, and system analysis through academic coursework and practical projects.
- Built application development experience through a cross-platform healthcare application, implementing modular UI components, interactive features, and Firebase integration for authentication and real-time data management.
- Conducted undergraduate research on system performance evaluation, applying load, stress, and spike testing with K6 and analyzing performance metrics through Grafana to assess system scalability and response time.

Project Experience

MedEase | Healthcare Mobile Application ☑ **June 2025**

- Developed a cross-platform healthcare application using Flutter and Dart, integrating Firebase Authentication and Cloud Firestore to support user authentication and real-time data management.
- Implemented interactive application features, including doctor consultations, appointment scheduling, and an in-app pharmacy with product catalog and transaction history.
- Developed a dynamic doctor listing module with specialty-based filtering, real-time search, and rating-based sorting, supported by Firestore data streams.
- Designed reusable UI components using Flutter widgets, including doctor cards, a bottom navigation bar, and category chip selectors, following Material Design 3 principles.

System Performance Analysis | Undergraduate Thesis **October 2025 – December 2025**

- Designed and executed load, stress, and spike testing scenarios using K6 to evaluate system performance and scalability under varying traffic conditions.
- Monitored and analyzed performance metrics through Grafana dashboards, including throughput, p95 response time, and request success rates.
- Conducted comparative performance analysis, recording sub-5 ms latency and peak throughput of 21.35 requests per second under sudden traffic surges.

Spotify Music Trend Analysis | Statistical Data Project **May 2024**

- Processed music datasets from Kaggle using Python and Pandas to prepare data for statistical analysis.
- Applied multiple linear regression and statistical hypothesis testing to examine relationships between playlist inclusions, streaming counts, and Spotify chart rankings.
- Developed data visualizations using Matplotlib and Plotly to communicate statistical findings and observed trends.

Organizational Experience

Information Technology Student Association (HMIT) | Fundraising Staff **2023 – 2024**

- Coordinated corporate sponsorship outreach and fundraising initiatives to support organizational funding and event budget requirements.
- Managed fundraising campaigns and merchandise operations, overseeing the production and distribution of organizational merchandise to support operational funding.

PKKMB Telkom University Jakarta | Logistics Coordinator **2023 – 2024**

- Coordinated vendor procurement and equipment requirements, including seating, staging, air conditioning units, and event plaques, to support event preparation and execution.
- Managed logistical operations covering food and beverage distribution, transportation arrangements, and on-site technical requirements to support smooth event execution.

Skills ☑

Programming Language

- Java Script
- Dart
- SQL
- Python

Frameworks & Libraries

- Flutter
- Bootstrap
- Tailwind CSS (Familiar)
- Next.js (Familiar)
- Laravel (Familiar)

Database & Backend Services

- Firebase Authentication
- Cloud Firestore
- MySQL
- SQLite
- PostgreSQL (Familiar)

Tools

- Git
- Node.js
- K6
- Grafana
- Google Colab

Soft Skills

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Team Collaboration
- Communication
- Adaptability

Additional Projects & Achievements

- Developed academic software projects involving application development, feature implementation, and software testing and validation.
- Participated in collaborative, team-based project development, contributing to application implementation, testing, and technical documentation.
